OBJECTIVE

Software Engineer with experience in front-end web development and UI design, looking for a position where I can leverage my skills to create high-quality software products and enhance user's experiences.

PROJECTS

Freelance Website | *React, TypeScript, HTML, SCSS*

- Developed engaging, user-centric, responsive, and accessible front end that boosts the business's online presence
- Leveraged Netlify deployment and secured form submission to promote user and business communications

UNT Canteen | *React, JavaScript, HTML, CSS, Figma*

- Lead project's UI design, ensuring a visually appealing and user-friendly interface
- Prioritized accessibility and responsive design principles to create a seamless experience for diverse users and devices
- Utilized backend APIs to dynamically display data on the frontend, providing users with up-to-date information

Weather App | *React, JavaScript, HTML, CSS*

- Developed a weather app using React framework
- Used an external weather API to fetch real-time weather data
- Integrated Material UI components for a more polished and user-friendly interface
- Utilized JSON file to store and manipulate data
- Implemented search bar, location-based weather, and detailed weather information

L.E.A vinyl Record | *JavaScript, HTML, CSS*

- Create an e-commerce website for a mock-up vinyl record shop
- Integrated Spotify API for real-time music content on the e-commerce website
- Designed and work on front end development to enhance user experience

TECHNICAL SKILLS

Languages: C/C++, TypeScript, JavaScript, SQL, PostgreSQL, HTML/CSS, SCSS

Frameworks: React, Material-UI, Jest

Dev Tools: Visual Studio, VS Code, Git, Figma
